

ACRYLICON

Your partner
in MMA Resin Production

Acrylicon Polymers

MMA Production for your Global Market

**Let us take care of your production
and logistics.**

We have built a large modern production plant with capacity for many years to come. Our large supplier network and purchasing power add value and dependability to your operations.

World Wide Reach

Your Trusted Manufacturer

Partnership

Let us help you support your customers, with **quality products** delivered when you need them.

Trust

Discretion and confidentiality guaranteed.
We hope to build a relationship based on trust with our partners.

Long Term

We are looking to build **long-term partnerships** with like minded suppliers who value **quality and reliability.**

Solutions

With over **40 years** experience of MMA products and their uses, we can help you find and create **innovative solutions** to your customers needs.

With one of the most modern MMA Resin production facilities in the world, we are able to produce a wide range of MMA resin products for construction applications.

Having been established in the market for over 40 years we built our new factory with the future in mind. We have the in-built ability to expand and accommodate more than 7000 tonnes per year - working one shift.

You can get products to **your own specification**, or we can create new products to your requirements using our **in-house R+D facilities**.

Utilising different, more modern and efficient production technology has allowed us to **increase capacity and improve quality and consistency**. With **less than 0.07% variation** between batches. Every batch is fully tested before shipping, with samples retained for **2 years**.

We currently export products world wide, and have experience with **shipping, air freight and road haulage**. We can either provide this facility to you, or sell **"factory" gate - tailoring a solution** to fit around your existing operations.

Our modern, fully equipped in-house
R+D Laboratory

Located in the North of Germany, between the airports of **Hamburg and Berlin**, we also gain great access to the ports of **Hamburg, Amsterdam and Bremerhaven**.

Packaging can be tailored to your individual requirement. We can create all **Material Safety Data Sheets**, and can even arrange **certification** if required.

The Factory and all products are **CE certified** for your peace of mind. **Full discretion and confidentiality is assured**.

Contact us today,

and see how we can help you deliver quality materials, at great prices, on time.
